How to install EoC Controller in an existing coax installation

How to install EoC Controller in an existing coax installation

1)

Mount the Controller in 19" rack or on the wall with the brackets

## \*) Safety

Controller units must be correctly earthed according to applicable national regulations.

Disconnect the output cable from the TV signal device (shown here with TV out from a headend)

Connect the cable to one of the EoC out 1-4 on the Controller

Note that each EoC output can support up to 16 endpoints

Mount a connection cable to connect your TV signal to the TV in port on the controller.

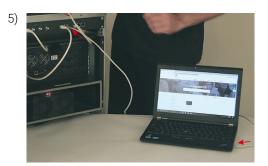

Connect your router or internet modem to the EoC controller with an ethernet patch cable.

If you use the default setup

- port 2 is for a private network
- port 3 is for guest network
- port 4 is for IP TV

Connect you laptop to the EoC controller in ethernet port 1 with an ethernet patch cable

Open your browser
Type in: http://setup.eoc

Enter username and password at the logon prompt.

Default login username/password is: admin/admin

Remember to change this after first login.

Just follow the 7 steps from the GUI to set up your EoC Controller

Now you are finished with the configuration > click Finish and you will see the System Status
